Cybersecurity Dialogues Congress Romania, 10th edition Sibiu, September 25-28, 2024. "Digital Humanism in the Cyber Age: Reflecting a Decade of Cybersecurity Evolution and Pioneering the Next Ten Years".

Ten years of Cybersecurity Dialogues in the fast-evolving cyber world must be celebrated. The Cybersecurity Dialogues in Sibiu are now a reality and came to age.

While we will have a Cybersecurity Dialogues retrospective looking back to the Dialogues first ten years and the ICT evolution since our foundation in 2014, we will have a foresight look to the end of the decade and beyond.

How will the past decade impact on the coming ten years? Did the past predictions become all a reality? The last decade was characterized by a volatile, uncertain, complex and ambiguous (VUCA) environment. Now, we enter a b*rittle, anxious, non-linear and incomprehensible* (BANI) world. As a result, the stakes will be even higher during the next decade.

Join us at the upcoming 10 anniversary edition of the Cybersecurity Dialogues in Sibiu, where we delve into the evolution of the last decade and explore what lies ahead in the coming decade.

Participate and gain valuable insights from industry experts, thought leaders, and innovators as they discuss the ever-changing landscape of cybersecurity and the ever more important digital humanism vision. Discover the latest technologies trends, strategies, and scope in on those foresights that will shape the future of digital security.

The Cybersecurity Dialogues will provide you with a unique opportunity to present your views, to exchange with experts in the field and to improve your expertise.
