

The "Sibiu Cybersecurity Dialogues" Congress, at the 10th edition

of Cargo Day - 26/09/2024

In an increasingly connected world, cyber threats have grown alarmingly, and according to Cybersecurity Ventures' latest report, ransomware attacks have increased by more than 150% in the past year, and the global cost of cybercrime will exceed \$10.5 trillion of dollars/year by 2025 (compared to 3 trillion in 2015).

These statistics underscore the vital importance of educational and knowledge-sharing initiatives, such as the "Sibiu Cybersecurity Dialogues" congress, to help organizations and individuals defend themselves effectively against these threats.

The 10th edition of the congress will be held in Sibiu, between September 25-28, where more than 30 experts and specialists in cyber security from Romania and abroad will address essential topics under the general theme: **Digital Humanism in the era Cyber: Lessons from the Last Decade of Cyber Security Evolution and Pioneering the Next 10 Years** .

" Since 2013, we have organized 9 annual congresses in Sibiu, events further supported by the Swiss Embassy, which patronizes our congress, having as its main business partner the Swiss-Romanian Chamber of Commerce and collaborating with numerous Romanian and international state institutions, as well as with the business and private environment. Swiss Webacademy fulfills its mission to bring to companies, institutions, young people in training, children and parents the essential information about the cyber challenges of today's world and how we can protect ourselves in the virtual space ", said Daniela Chrzanovski, president and founder of Swiss Webacademy .

The themes of the congress cover issues such as protecting critical infrastructures in the digital age, preparing for the impact of Generative Artificial Intelligence, the revolution brought by AI and quantum technologies in cyber security, as well as promoting behavioral change to reduce security risks.

Our guests will also discuss topics related to NIS2 and the dynamics of cyber security. Many other topics will be analyzed during the 6 panels on the day of the Congress and in the 6 master-class sessions ", added Chrzanovski .

Each participant of the "Sibiu Cybersecurity Dialogues" will have the opportunity to learn new things from experts from Switzerland, Italy, France, Germany, England, Scotland, Venezuela and Romania, who will present the latest information and trends in the field of cyber security.

The first day of the event is dedicated to raising awareness among children of all ages, who will develop the necessary skills to protect themselves on the Internet.

This initiative is supported by the Swiss Embassy, the Swiss-Romanian Chamber of Commerce, DNSC, the Romanian Police, NTT DATA Romania, Swiss Webacademy and Women4Cyber, who collaborate to increase the defense capacity against digital dangers.

Children will have the opportunity to explore the adventures of the Webster family, presented in three online safety comic booklets dedicated to them and their families.

These brochures, developed with the expertise of cyber security institutions in Switzerland, were translated into Romanian with the support of the Swiss Federal Communications Office, the Swiss Embassy in Bucharest, the DNSC and the Swiss Webacademy.

The "Digital Jungle" program, developed by the NTT DATA Romania team in over 35 schools throughout the country, will offer children a unique experience.

" *The Digital Jungle, a concept developed by NTT DATA, is essential to prepare children to navigate through modern technological complexity. Children's Awareness Day complements this initiative, aiming to raise awareness of digital security from an early age, thus contributing to the formation of a responsible and prepared generation for the challenges of the future. Unlike adults, who can decide to document themselves using various sources, we must create opportunities for children to understand the risks of the digital world* ", emphasized **Cantemir Mihu, site manager of Sibiu Branch, NTT DATA Romania** .

On the second day of the event, the actual "Sibiu Cybersecurity Dialogues" congress will take place. During the 6 panels, the speakers will address complex cyber security topics, applicable in various fields. The conference will be opened by the Swiss ambassador to Romania, Massimo Baggi, together with the president of the Sibiu County Council, Daniela Câmpean.

Among the speakers at the congress are:

- **Vassilios Manoussos** , manager of The Cyber Academy, forensic scientist, expert witness in Digital Evidence Strathclyde Forensics (Scotland): " *As technology evolves faster than ever in history, so does cybercrime, which remains the most unpunished form of crime globally. It's time to start the conversation about how digital evidence can transform the legal infrastructure, help bring justice to society and maintain national security.* "
- **Raj Meghani** , co-founder CMO, head of Product & Sales BLOCKAPT (UK): " *In cyber security, I believe that sharing knowledge means multiplying power. Let's learn, adapt and defend together.* "
- **Moe Jame** , founder of Team Extension: " *The key to cyber security isn't just about technology – it's about empowering people to adopt safer digital habits in a world dominated by artificial intelligence.* "
- **Quentin Ladetto** , head of Technology Foresight Swiss DoD, co-founder of atelierdesfuturs.org & Association Futurs (Switzerland): " *We must remain vigilant: yesterday's future is not necessarily today's future.* "
- **Fraga Țariuc** , Women4Cyber Romania, president & founder: " *Cyber security is the foundation of a secure digital future. Awareness and education are essential, and women's contributions bring valuable and innovative perspectives.* "

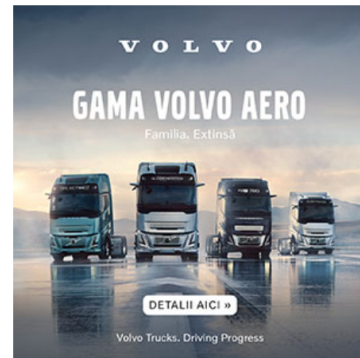

The next two days of the event are dedicated to Masterclass sessions and practical sessions in the field of cyber security, culminating in a competition dedicated to young specialists.

Founded in 2013 by the company Swiss Webacademy , the congress benefited, from the very beginning, from the support of the Swiss Embassy and the Sibiu County Council. The Switzerland-Romania Chamber of Commerce was and continues to be the main business partner of the event. Also, co-organizers of the congress are NTT DATA Romania and Sibiu IT Cluster.

The Congress enjoys the continuous collaboration of key entities from Romania in the field of cyber security, including DNSC, CYBERINT, the Romanian Police, DCCO, ANCOM, together with prestigious global partners, such as C-PROC (Council of Europe), Geneva Cantonal Police (Switzerland), Start 4.0 (Italy), Electrical Grid Cyber Security (Italy) and French Gendarmerie (France).
